Edinburgh UK . johnso.stuart@gmail.com . Open to relocation

PROFILE

Senior business intelligence analyst, specialising in operations, with 5+ years driving performance across a 500+ headcount global IT services division. Develops analytical tools and reporting infrastructure that connect data to decision-making at senior level, with experience in profitability, workforce planning, and growth. Experienced with Power BI, Tableau, SQL, GenAI and Excel, and advises teams across the UK as an SME on BI tools and Reporting. Holds an integrated Master's in Physics (MPhys).

EXPERIENCE

CGI IT UK Ltd.	August 2021 - Present
Senior Operations Analyst	April 2024 - Present
• BI Subject Matter Expert. Auditing reporting processes and providing guidance on Tableau, Power BI, Oracle Analytics and Reporting Governance to colleagues globally. • Developed a workforce capacity forecast dashboard in Oracle Analytics, achieving a 90% forecast accuracy of resource capacity up to 8 weeks ahead. • Designed a data pipeline and reporting process for forecasting headcount growth, transforming scattered organisational data from Recruitment, HR and Operations into simple, effective dashboards and slide deck templates for management reviews. • Maintains existing Power BI Dashboards and supports the PMO team with DAX and Power Query M, supports other teams with ad-hoc Power BI dashboard advisory or development. • Learnt how to use Tableau and developed and deployed a CRM dashboard to our management team, providing sales pipeline transparency and improving our CRM data quality.	

- Promoted after 6 months to own partner efficiency metrics and operational reporting within the business unit.

Operations Analyst

August 2023 – April 2024

- Led an initiative to improve the billable utilisation reporting, involving automation with VBA and building an interactive Oracle Analytics dashboard serving over 20 Directors and VPs in the region.
- Automated reporting pipelines using Power Query and VBA, reducing data refresh time by 90% for the weekly Operations pack.
- Led the migration of Power BI dashboards to CGI's Oracle Analytics Server, an on-premise visualisation platform, deploying the dashboards to 7 sectors and 100+ executive users UK-wide.

Project Management Office Analyst

August 2022 – August 2023

- Developed and deployed Power BI dashboards for project finances to a userbase of 50+ leaders. Responsible for the complete end to end dashboard delivery including DAX, data modelling, visual design, security risk assessment, license procurement and access control.
- Awarded Significantly Exceeds Expectations, a rare performance rating given to select few partners each year, for my work on the Power BI dashboard initiative. Also received promotion.
- Managed invoicing, procurement and cash collection operations, meeting monthly targets of £100,000+ with 100% queries resolved within a 7-day SLA.
- Maintained and reported on project risk register and contractual obligations.

Test Analyst

August 2021 – August 2022

- Led system and user acceptance testing in a team of 3 testers on a digital transformation project, involving elucidating business requirements, creating test scripts and collaborating with the client to ensure the product fit their needs. 50+ Test scripts created, 100% requirement coverage and pass rate.
- Managed deployment of 300 iPhones to social workers in the region, completed on schedule with no incidents.
- Achieved CTFL certification – score 88/100.

EDUCATION

University of Edinburgh – Physics (MPhys)

Aug 2014 – Aug 2020

- Geophysics, Biological Physics, Machine Learning and computational modelling.
- **Technical Project:** Machine learning analysis in Python (scikit-learn, matplotlib) for complex trend identification.

SKILLS

- **Tools:** Power BI (DAX, Power Query M, RLS, Fabric Capacities), Tableau (Desktop and Server), SQL, Git, JIRA, MS Project, Excel (Power Query, VBA), OpenAI Codex, Oracle Analytics
- **Business:** Business intelligence, Business performance management, Workforce Planning, Forecasting, Process optimisation, Agile delivery, Waterfall delivery, Stakeholder management, Cross-functional collaboration, Project Planning, Project Finance, Reporting Process and Governance

ADDITIONAL

- Co-chair regional sustainability committee (Scotland & Northern Ireland), organising social responsibility initiatives across offices (Litter picks, Foodbank collection).
- Progressing in Mandarin Chinese (HSK2 currently)
