

# STUART JOHNSON

[johnso.stuart@gmail.com](mailto:johnso.stuart@gmail.com) | Edinburgh, United Kingdom | Open to relocation

## Professional Profile

Business operations lead with 5+ years driving performance across a 500+ person global IT services division. Develops KPI frameworks, analytical tools, and reporting infrastructure that connect data to decision-making at senior level — with focus on profitability, workforce utilisation, and growth pipeline. Experienced in process design, cross-functional stakeholder engagement, and translating operational analysis into measurable business improvement. Experienced with Power BI, Tableau, SQL, Codex and Excel, and advises teams across the UK as an SME on BI tools and Reporting. Holds an MSc in Physics.

## Employment History

### Senior Operations Analyst | CGI | *April 2024 – Present*

- Facilitates weekly and quarterly operational reviews and business planning with senior management.
- Monitors utilisation and margin KPI's, identifies and resolves anomalies and helps leaders understand the key drivers behind their KPI trends.
- Optimise workforce planning by identifying future supply based on project seasonality and mapping this to project pipeline. 95% accurate supply forecast up to 8 weeks in advance.
- Leads process improvement initiatives, including designing and implementing a headcount tracking process used by managers for oversight of recruitment and workforce planning.

### Operations Analyst | CGI | *August 2023 – April 2024*

- Automated reporting pipelines using Power Query and VBA, reducing report generation time by 90%.
- Led an initiative to improve the billable utilisation reporting process within the team, involving automation with VBA and building an interactive Oracle Analytics dashboard. This improved the process from a static Excel workbook sent out once a week to a self-service dashboard accessible at any time.

### **Project Management Office Analyst | CGI | August 2022 – August 2023**

- Managed invoicing, procurement and cash collection operations, meeting monthly targets of £100,000+ with 100% queries resolved within a 7-day SLA.
- Maintained and reported on project risk register and contractual obligations.
- Developed and deployed Power BI dashboards for project finances to a userbase of 50+ leaders. Responsible for data modelling, security risk assessment and delivery. Reduced time to decision by 50%.

### **Test Analyst | CGI | August 2021 – August 2022**

- Led system and user acceptance testing in a team of 3 testers on a digital transformation project, involving elucidating business requirements, creating test scripts and collaborating with the client to ensure the product fit their needs. 50+ Test scripts created, 100% requirement coverage and pass rate.
- Managed deployment of 300 iPhones to social workers in the region, completed on schedule with no incidents.
- Achieved CTFL certification – score 88/100.

## **Education**

### **Physics, University of Edinburgh Aug 2014 - Aug 2020**

- **Master of Physics (MPhys):** Advanced quantitative analysis and computational modeling.
- **Technical Project:** Machine learning analysis in Python (scikit-learn, matplotlib) for complex trend identification.

## **Core Skills**

- **Operations:** Business performance management, Workforce Planning, Forecasting, KPI monitoring, Process optimisation, Agile delivery, Waterfall delivery
- **Tools:** Tableau, Power BI, SQL, Git, JIRA, MS Project, Excel (Power Query, VBA), OpenAI Codex, LLM
- **Skills:** Data analysis and visualisation, Stakeholder management, Reporting Process and Governance, Cross-functional collaboration, Project Planning

### **Additional Initiatives**

- Co-chair regional sustainability committee (Scotland & Northern Ireland), organizing social responsibility initiatives across offices (Litter picks, Foodbank collection).
- UK-Wide BI Tools Subject Matter Expert — Auditing reporting processes and providing guidance on Governance, Tableau, Power BI and Oracle BI to colleagues and partners across the business.
- Learning Mandarin Chinese (HSK2 currently)
